

World-Class Brain Care Close to Home

When it comes to your brain, you want the very best care. And now you can get it close to home. The Penn Highlands Brain and Spine Center — along with Penn Highlands Neurosurgery — have joined forces to bring the most advanced and effective diagnosis and treatment of brain conditions to people throughout Northwestern/Central and Southwestern Pennsylvania.

With four clinics throughout Pennsylvania, our expert neurosurgeons can evaluate you, order diagnostic and imaging tests, and provide nonsurgical treatment without requiring you to drive very far. And, if you need surgery, you can get it at Penn Highlands DuBois and Penn Highlands Mon Valley, with all your pre- and post-surgery care provided in the clinic closest to you.

Here are a few good reasons for considering Penn Highlands if you have a brain tumor or another neurological brain condition:

- Diagnosis and treatment provided by a world-class neurosurgery team.
- Decades of experience with simple to complex brain procedures.
- Integrated care with Penn Highlands oncologists for brain tumors
- Five clinics throughout Pennsylvania.
- Minimally invasive surgery when possible
- Use of high-energy radiation to treat brain conditions without surgery (knifeless brain surgery).

We can see most patients within a week! Call today to make an appointment: 814-503-4433.

Expert Brain Care

Penn Highlands Healthcare

Specialized Care For Brain Tumors And Other Neurological Conditions

Leading.
Innovating.
Advancing.

Handle With Caution

Get expert diagnosis and treatment for your brain tumor or neurological condition.

People throughout Northwestern/Central and Southwestern Pennsylvania no longer need to drive far distances to get the very best neurosurgical care. At the Penn Highlands Brain and Spine Center, our experts have decades of experience in treating all types of neurological conditions at some of Pennsylvania's leading health systems. With five clinics throughout the area, that same care is now available close to you.

We diagnose and treat all types of brain and neurological conditions, including:

- Metastatic brain tumors (brain tumors created by cancer in another part of the body that has spread to the brain).
- Primary brain tumors, such as glioblastomas and meningiomas.
- Tumors of the skull base, spinal cord, pituitary gland, or spine.
- Stroke.
- Trigeminal neuralgia and nonspecific facial pain.
- Peripheral nerve disorders.
- Carpal tunnel syndrome.

EXPERT SURGERY AT PENN HIGHLANDS BRAIN AND SPINE CENTER

If you need surgery, there's no need to change doctors or drive a long distance for care with the Penn Highlands Brain and Spine Center in DuBois and Monongahela. Our expert neurosurgeons have performed thousands of surgeries, published hundreds of neurosurgery research studies and articles, and taught neurosurgery courses across the country. Neurosurgeons at Penn Highlands Brain and Spine Center offer all types of simple and complex neurosurgeries, including:

- Craniotomies.
- Tumor treatment, including:
 - Minimally invasive cranial surgery.
 - Craniotomy and tumor removal.
 - Stereotactic radiosurgery (high-intensity radiation without surgery).
- Stroke treatment.
- Ventriculoperitoneal (VP) shunt.
- Microvascular (MVD) decompression for trigeminal neuralgia.
- Peripheral nerve disorder procedures.
- Carpal tunnel surgery.
