

Heart Care

A healthy heart is central to overall good health. The heart muscle pumps blood to all parts of the body to provide it with the oxygen and nutrients necessary to properly function.

Not all heart problems have noticeable symptoms and it is good to have experts you can trust to provide care when you need it. The Heart Center of Penn Highlands Healthcare offers clinics throughout Pennsylvania so that you can receive 24-hour comprehensive cardiac care by experts close to home.

Backed by state-of-the-art diagnostic equipment and a full range of inpatient and outpatient services, The Heart Center can perform life-saving advanced cardiac procedures.

Heart Care

Penn Highlands Healthcare

Advanced Medicine. Here.

Beating.
Growing.
Advancing.

While people may be familiar with The Heart Center on the fifth floor of Penn Highlands DuBois, its advanced cardiac, thoracic and vascular care services are provided at all hospitals within the Penn Highlands health system.

OUR SKILLED TEAM

Our team of dedicated heart specialists provide detailed diagnoses and offer the latest therapies to treat heart conditions. At The Heart Center, our first focus is on helping the people in our communities stay heart healthy by offering a preventive care program. If you have a suspected heart disease, Penn Highlands cardiologists in our heart care clinics throughout Pennsylvania provide advanced diagnostic testing, including EKG and stress tests. Once the diagnosis is made, the heart doctors develop a customized treatment plan to help you regain and maintain as much health as possible. Our cardiac team also provides treatments, including minimally invasive and complex heart surgery, with an excellent cardiac rehabilitation program.

CONDITIONS WE TREAT
